

The European Chapter of the American College of Nutrition

CARDIOMETABOLIC RISK IN ADULTS AND CHILDREN: IMPACT OF ENERGY METABOLISM AND FAT DISTRIBUTION

March 4-5, 2013

Institute of Clinical Physiology
in the Research Area of the
National Research Council
Pisa, Italy

European Chapter of the American College of Nutrition
International congress (ECACN 2013)

Cardiometabolic risk in adults and children:
impact of energy metabolism and fat distribution

of the 5 March 2013, Pisa, Italy

European Chapter of the American College of Nutrition
International congress (ECACN 2013)

Cardiometabolic risk in adults and children: impact of energy metabolism and fat distribution

Tuesday, 5th march 2013

9.00-10.00 **Abstract's oral presentation**

10.00-11.30 **Inflammation, ectopic fat and cardiometabolic risk**

- Ectopic fat and inflammation **F. Marra**
- Metabolic inflammation and diabetes complications: evidence from experimental and clinical studies **M Federici**
- From NAFLD to NASH and HCC **E. Bugianesi**

11.30 -12.00 Coffee-break-e poster

12.00-13.00 **Plenary lecture**

From metabolic normality to cardiometabolic risk **E. Ferrannini**

13.00-14.30 **LUNCH / e-poster**

14.30-15.30 **Plenary lecture**

Impact of bariatric surgery on cardiometabolic risk **G. Mingrone**

15.30-17.30 **Fat in heart and vessel and cardiometabolic risk**

- Obesity, epicardial fat and cardiovascular risk **R. Sicari**
- Obesity paradox and cardiovascular disease **C. Carpeggiani**
- Physical activity, fatty liver, and cardiovascular risk. **M Kozakova**
- Protection of Cardiovascular Diseases using Coenzyme Q10 **D. Bagchi**

17.45 **Closing Remarks: A. Gastaldelli**
